

Amendments to the Claims:

This listing of claims replaces all prior versions and listings of claims in the application:

Listing of Claims:

1. (Currently Amended) A display device in which a thin film transistor is disposed on an insulative substrate, said thin film transistor comprising:
 - a first gate electrode; a gate insulating film; a semiconductor film which is formed on said gate insulating film and which has a channel;
 - a insulating film;
 - a reflective display electrode connected to a source which is formed in said semiconductor film, said display electrode being elongated so as to extend above said channel of said thin film transistor, andwherein a second gate electrode formed between said first gate electrode and said display electrode.

2. (Currently Amended) A display device in which a thin film transistor is disposed on an insulative substrate, said thin film transistor comprising:
 - a first gate electrode; a gate insulating film; a semiconductor film which is formed on said gate insulating film and which has a channel;
 - a insulating film;
 - a reflective display electrode connected to a source which is formed in said semiconductor film, said display electrode being elongated so as to extend above said channel of said thin film transistor; anda second gate electrode formed between said first gate electrode and said display electrode,
